WINTER. See !—now stern Winter comes with rigid moan, Fiercely ruling on his sparry throne, Bidding fair Nature's vernal joys retire, And sink beneath his all-subduing ire; and sink beneath his an-subduing he; let, sullen Monarch! cheeriess as thou art. Thou yield'st a lesson to the sensual heart; That all must bow, thy carnestness reveals. For every heart thy sov'reign influence feels. Then let us view thee now, while reason sways, Thou whose firm mandate even life obeys, For in thy lurid aspect man is taught to see A faded emblem of what he soon must be. When envious death shall bid frail scenes decay, And senseless dust go cleave to kindred clay. Yes-thou blight'st fair Creation's bloom, And bid'st us all prepare to meet that doom.
When sinks the heart beneath thy chilling blast, Which soon consigns us to oblivion's waste. Deep hour of dread! — 'tis thus we stand, Unconscious when death's stern command, May bid us perish 'neath his mighty power, Thus destin'd fall in Winter's faded hour. Then what is life?—its transitory joys?— Nought but a gem that certain fate destroys;

Nought but a gem that certain rate destroys;
The like a dew-drop glittering on the spray,
Which by the breeze is heedless borne away,
While scarce a vestige there remains to tell.
From whence the frail, the trembling treasure fell. From whence the Irali, the treming stems. Thus short, alas! is life's propitious scene—E'en fleeting ages seem a lengthen'd dream;
Too soon its brightest, vernal beauties fade!
A transient season, and to waste is laid,
That mortal form—that form which Nature gave Beyond the noblest arm of manto save. Yet smooth'd must be thy keenest pangs. O death! Calm must the bosom yield its parting breath, When resignation o'er the feelings reign, And sweetly eases life's expiring pain— When sinks the soul on thy assursive breast, Which source bliss, to meek, celestial rest: Oh! yea—thy whispering accents speak of heaven—Of tranquil peac—of foliaes past, forgiven—And Joyful bids the soul immortal rise,
To join its kindred spirits in the skies.

LINES On taking an evening walk round the Wash-

ington Square. On yonder cold and leafless trees, The orb of night is sweetly shining, And thro' their limbs the fitful breeze, Now murmurs soft—now seems repining; Those trees in gloomy sadness wave, For they grow over many a grave! There, those who once our city fill'd

There, those who once our city fill'd Have long since found a cheerless dwelling, 'There hearts have long by death been chill'd, Which once with life's swift tide were swelling, And there are blended friends and foes, Together in one sad repose. And thus it is! In this dark life

Man persecutes his friend and brother,
Nor ceases the unho's strife
Until death does his passions smother;
In peace we meet not, 'till alus!
We mingle in one common mass! "I'is said that Patriotism here Will rear a monument of glory

o him whose memory is most dear Who rais'd his country high in story: I'is due—but let not gratitude On sleeping dust its arch intrude

How many, ere this year rolls round,
who now of nought but joy are dreaming.
Will steep beneath the cold, cold ground,
And o'er their graves you moon be beaming;
How much of youth, and beauty too,
Will stumber 'neath the midnight dew! We think not-pause not-heed not, tho

Each hour some youthful graces rifles; Our hearts are fix'd on things below-On fife's debasing toys and trifles: Until death comes, and then we find Those toys were light as summer wind. And yet, methinks, I'll bail the hour,

And yet, methinks, I'll hall the hour,
When death with solemn step approaches;
With joy I'll hall that dreaded power.
Whose fatal scythe on life encroaches,
And in him see the best of friends, Whose presence many a sorrow ends. Four lustres scarce have o'er me roll'd,

ife seems a weary tale, "thrice told" Its promis'd joy no longer blesses: The future bears no promise here-The past but prompts the sorrowing tear.

She who, in boyhood's happy day, With kind, maternal smiles caress'd me-Who chas'd each childish pain away. Each pain which e'en in thought distress'd me, My mother dear, lies cold in earth, And with her fled all joy and mirth.

Life must be borne, tho' sad its load, Tho' we from earth would fain be starting. The soul must dwell in its abode. Till HE above decree its parting! nd then how light it wings its way,

Freed from its tenement of clay! Oh! let each breast, while swelling high With life, abjure its faults and errors, That when the hour of death draws nigh,

That last sad hour may bear no terrors or man let each beart throb with love-Tis offering meet to God above. With millions who have gone before us! Who'd not resign this fever sh breath, When JESU's promise hovers o'er us!

Oh! let that promise dry our tears, And banish all desponding fears.

An Old Soldier's Thoughts on seeing La Fuyette. I knew him by the smile that shone, And glisten'd in his dark blue eye; I knew he was a fav'rite son.

I knew in Freedom's cause he'd die: But 'tis enough to know-forget I never will the brave Fayette. I saw him oft upon the plain, And view'd him in his strength and might:

I saw him soothe the dving sla Or lose my knowledge of Fayette

I fought with him at Brandywine, And saw the day the patriot won;
I bound his wound—oh! "'twas divine
To hear him shout, "On! Freemen, en!" And can I such a man forget

No!-memory serves me still, Fayette. I saw him on the rampart's height, When cannons piere'd the wounded air; I saw him cheer the brave in fight, When patriotism vanquished care; No longer think of La Fayette

No!-rather let my aching frame Crumble to dust -to vultures give Than be it said that hallow'd name, Was from a soldier's mem'ry driven. Who fought so bravely as Fayette.

I saw him 'mid the battle's rage. When clouds of anguish hover'd o'er aw him weep o'er youth and age, While weltering in their crimson gore I saw him weep o'er

And can I now that time forget, I saw him smile, and face the foe, Unsheath the sword, receive the scar Por he was brave—he did not know,
Nor own the dangers of the war;
And shall an aged man forget,
The noble Patriot, La Fayette?

I saw him mount the battle steed. The gallant hero ne'er should die. Where is there one who can forget the val rous deeds of La Fayette?

saw him in the hall of state, Beside Comenhia's greatest son;
While Liberty, with pride elate,
Perch'd on the valiant Washington!
And could I now that hour forget,
When thus I saw the brave Fayette?

when many a year had roll'd around.
But still he seem'd in health and prints,
As when I first the hero found;
And shall have the hero found;

But thanks to those who o'er us rule,

Ingrasitude no longer lives;
The only great republic school,
A nation's lanty freely gives: Then let us one e'er we forget The debt we owe the brave Fayette.

THE MORALIST.

VIRTUE-A SKETCH. "The only amarantine flower on earth is virtue; The only lasting treasure, truth."

When the amiable and accomplished lady Jane Grey was confined in the tower, previous to her execution, she wrote to her friend beautiful passage: "There is an eternity for all that belongs to virtue, and what we have done for her will advance even to the sea, however small the rivulet may have been

during our life." How expressively true! the pure and unsullied stream of virtue will ever meander through life's chequered course to the boundless ocean of eternity and happiness. Cynthia may reflect her borrowed light-the sun may revolve in his diurnal rotation, and his satellites irradiate our world with their splendor-yet the season will arrive when the voice that called Chaos into symmetrical existence, will consign these created luminaries into the abyss of their former darkness and oblivion. But virtue will live beyond the shades of the tomb-she will soar beyond the porter-she thought she had no friend in all bounds of creation, and be hallowed by the

holy seraphim. Without virtue no man can be truly bappy. There is no temporal pursuit, no pleasurable avocation in life unaccompanied by means had become exhausted. It was now vicissitudes and disappointments. Every idle pleasure has its consequent sorrow. The foundation of actual happiness cannot be laid in a heart that engenders vice and immorality. Its basis is a good conscience; and a pure pines and rocked her puny mansion. conscience is the infallible concomitant of virtue and religion alone. The wine cup that exhilarates the senses for a short lived moment, not only brings the melancholy reflections of a cooler judgment-but when indulged in licentiousness, it is the bane of every valuable and social blessing that belongs to the sanctity of character. Vice in every shape is illusory and pernicious; virtue is the only amaranth. It is a gem that never ceases to sparkle-it is an attribute amiable to man, and sacred to God.

IDLENESS-From Jeremy Taylor.

"God hath given every man work enough to do, that there may be no room for idleness; and yet hath so ordered the world, that there the fewest businesses of the world, is called upon to spend more time in the dressing of his soul; and he that hath the most affairs, may so order them, that they shall be a ser-may so order them, that they shall be a ser-while the ability to gain a sustenance reare blessed with prayers and actions of reli-wants to supply may suffer with fortitude the on, and all day long hallowed by a holy in tention.

"However, so long as idleness is quite shut out from our lives, all the sins of wantonness softness and efferninacy, are perverted, and there is but little room left for temptation; therefore, to a busy man, temptation is fain to climb up together with his business, and sins creep on him only by accidents and occasions; whereas, to an idle person, they come in a full body, and with open violence, and the impudence of a restless importunity.

"Idleness is called the 'sin of Sodom and her daughters,' and indeed is 'the burial of a living man;' an idle person being so useless to any purposes of God and man, that he is like one that is dead, unconcerned in the changes and necessities of the world; and he only lives to spend his time, and eat the fruits of the earth like a vermin or a wolf: when their times come, they die and perish, and in the mean time do no good; they neither plough nor carry burthens; all they do, either

s unprofitable or mischievous. "Idleness is the greatest prodigality in the world; it throws away that which is invaluable in respect to its present use, and irreparable when it is past, being to be recovered by no power of art or nature."

The Journal of a Wiltshire Curate.

Monday.-Received ten pounds from my rector, Doctor Snarl, being one half year's salary-Obliged to wait a long time before my admittance to the Doctor; and even when admitted, was never once asked to sit down or refresh myself, though I had walked eleven miles. Item—the Doctor hinted he could have

the curacy filled for fifteen pounds a year. Tuesday .- Paid nine pounds to seven different people; but could not buy the second hand pair of black breeches offered me as a great bargain, by Cabbage the taylor, my wife wanting a petticoat above all things, and neither Betsy nor Polly having a shoe to go to

church. Wednesday .- My wife bought a petticoat for herself, and shoes for her two daughters; but, unluckily, in coming home, dropped half a guinea through a hole, which she had never before perceived in her pocket, and reduced all our cash in the world to half a crown .-Item-chid my poor woman for being afflicted at the misfortune, and tenderly advised her to

depend upon the goodness of God.

Thursday .- Received a note from the ale house at the top of the hill, informing me that a gentleman begged to speak to me on pressing business. Went, and found it was an unfortunate member of a strolling company of players, who was pledged for seven pence half penny. In a struggle what to do; -the baker, hough we had paid him but on Tuesday, quarrelled with us, to avoid giving any credit in future; and George Greasy, the butcher, sent us word, that he heard it whispered, how the rector intended to take a curate who would do the parish duty at an inferior price; and therefore though he would do any thing to serve me, advised me to deal with Peter Paunch, at the upper end of the town; mortifying reflections these. But a want of humanity is in my opinion a want of justice;-the Father of the universe lends his blessings to us, with a view that we should relieve a brother in distress; and we consequently do no more than pay a debt, when we perform an act of benevolence. Paid the stranger's reckoning out of the shilling in my pocket, and

gave him the remainder of the money to proecute his journey. Friday .- A very scanty dinner; and pretended therefore to be ill, that by avoiding to est, I might leave something like enough for my poer wife and children. I told my wife what eye of the traveller, in the beauty and numcreature, instead of blaming me for the action, vast height of the woods, as yet, hide many blessed the goodness of my heart, and burst a lovely prospect from view, yet we become into tears. Mem. Never to contradict her as reconciled in some measure to them, when long as I live; for the mind that can argue we behold the graceful deer, to which those

of virtue superior to the value of a kingdom. Saturday .- Wrote a sermon, which on Sunday I preached at four different parish churches, and came home excessively wearied, and excessively hungry; no more money than two pence halfpenny in the house; but see the goodness of God! the strolling player whom I temper, wanted to do me an essential piece of service: I had not been an hour at home, when he came in, and declaring himself my friend, Dr. Ascham a letter containing the following put a fifty pound note into my hand, and the next day presented me with a living of three nundred pounds sterling a year.

### THE LAST HERRING.

"Hoot away despair,

"Never yield to sorrow-"The blackest sky may wear

" A smiling face to-morrow." It was Saturday night, and the widow of the Pine Cottage sat by her blazing faggots with her five tattered children at her side endeavoring by listening to the artlessness of their juvenile prattle, to dissipate the heavy gloom that pressed upon her mind. For a long year her own feeble hands had provided for her helpless family, for she had no supthe wide unfriendly world around. That mysterious providence, the wisdom of whose ways are above human comprehension, had visited her with wasting sickness, and her little mid-winter, and the snow lay heavy and deep through the surrounding forests, while storms seemed gathering in the heavens, and the driving wind roared through the bending

The last herring smoked upon the coals before her; it was the only article of food she possessed; and no wonder if her desolate state brought up in her lone bosom all the anxieties of a mother when she looked upon her children; and no wonder, forlorn as she was, if she suffered the heart-swellings of despair to rise, even though she knew that He whose promise is to the widow, and to the orphan, cannot forget his word. Providence had many years before, taken from her an elder son, who went from his forest home, to try his fortune on the seas, since which she had heard no note or tidings of him; and in latter times she had been, by the hand of death, deprived of a companion and staff of support in her husband. Vet to this hour she shall be space for devotion. He that hath the favoret huginesses of the world is called able to provide for her little flock, but had never lost one opportunity of ministering to

the wants of the miserable and destitute. winter of want : his affections are not woundd, his heart is not wrung. The most desolate in populous cities, may have the charity he not quite closed her heart and hand, and shut her eyes on misery. But the industrious mother of helpless and depending children, far from the reach of human charity, has none of these to console her. And such a one was the widow of Pine Cottage; but as she bent over the fire and took up the last scanty remnant of food to spread before her children, her spirits seemed to brighten up, as by some sudden and mysterious impulse, and Cowper's beautiful lines came uncalled across her mind -

Judge not the Lord by feeble sense. But trust him for his grace, Behind a frowning Providence,

He hides a smiling face. The smoking herring was scarcely laid apon the table, when a gentle rap at the door, and the loud barking of the dog, attracted the attention of the family. The children flew to open it, and a weary traveller in tattered garments, and apparently indifferent health, entered, and begged a lodging and a mouthful of food;—"For," said he "it is now twenty-four hours since I tasted bread." The widow's heart bled anew, as under a fresh complication of distresses; for her sympathies ingered not round her own fire side. resitated not, even now -rest and a share of all she had, she proffered to the stranger .-We shall not be forsaken,' said she, ' or suf-

fer deeper for an act of charity. The traveller drew near the board, but when he saw the scanty fare, he raised his eyes towards heaven in astonishment- 'And s this all your store,' said he-' and a share of this do you offer to one you know not then never saw I Charity before! But madam, said he, 'do not wrong your children, by 'Ah,' said the poor widow, and the tear drops gushed into her eyes as she said on the face of the wide world, unless heaven has taken him away, and I only act towards you, as I would that others should act towards

him. God who sent manna from heaven can provide for us as he did for Israel-and how should I this night, offend HIM, if my son should be a wanderer, destitute as you, and he should have provided for him a home even as poor as this, were I to turn you unreliev-

The widow ended, and the stranger springing from his seat clasped her in his arms-God has indeed provided just such a home for your wandering son-and has given him wealth to feward the goodness of his bene-

factress -- My mother! oh my mother! It was her long lost son; returned to her bosom, from the Indies, abounding in riches. He had chosen this disguise, that he might the more completely surprise his family; and never was surprise more perfect, or followed by a sweeter cup of joy. That humble residence in the forest, was exchanged for one. comfortable, and indeed, beautiful in the vallev; and the widow lived long with her dutiful son, in the enjoyment of worldly plenty, and in the delightful employments of virtue and at this day the passer by is often pointed to the luxuriant willow that spreads its branches broad and green above her grave, whilst he listens to the recital of this simple and homely, but not altogether worthless tale.

The difficulty of ligent, and from a generous eccentricity of nicking a path through the Susquehanna woods, suitable for the girls, was at last amply repaid by the pleasure we enjoyed in contemplating the various beauties of the place. It was on this occasion, that a command was laid on me, the fulfilment of which was the composition of the following

ADDRESS TO CORA LINN. How sweetly wild this lovely spot,

These rugged rocks, this waterfall; By the sun's rays illumin'd not, Its canopy the hemlocks tall. As down the rock the water glides, It is not with a cataract's din; For love itself scarce gentler chides Than doth the stream of Cora Linn.

Though bright the trees that round it rise, When spring decks all in robes of green; Let richer now is autumn's dies With vellow red, and orange sheen; And though in vain, in wint'ry hours, I look for beauties that have been. Yet spring again, with leaves and flowers,

Shall grace the wild round Cora Linn.

In the small bason, where the tide Comes leaping from its rocky bed, 've watch'd the fishes peaceful glide, Though constant billows round them spread Thus joyous, in the tide of life, My way through billows may I win: And, peaceful in all nature's strife. Resemble thee, sweet Cora Linn.

Once, in this wild and lonely place, With nature's bounty still content, the Indians lived, a noble race. Ere they to Europe's vices bent. But now, no more the Indian views His form thy stream reflected in; No more, with active feet, pursues The wounded deer round Cora Linn!

or Europe's poison deep he drank, And for it sold his native wild; Below the brute his nature sank-No longer health and honour's child! Oh! may I recollect his doom.

And keep aloof from ways of sin, Ere joys for me no longer bloom, Nor thy sweet graces, Cora Linn. When this frail form has ceased to be.

And, freed from dust, the active soul No more shall find mortality Its visions dim, its flight control; From Heaven alone its pleasures wir, May this frail body, formed of dust, Hest in thy shadows, Cora Linn!

A then, if spirits ever stray Lound the clay they once possest, My soul shall often wing its way To seek my grave's low mossy breast! And then, day's bright glare shall close, And evening's calmness shall begin, Oh! what on earth could miss repose,

That heard thy murm'ring, Cora Linn!

FOR THE SATURDAY EVENING POST. From a ' Desultory Reader's Notes.'

FERAMORZ.

Whatever might have been the glory and brilliancy of the achievements of eminent military chiefs in ancient days, they have been equalled, if not surpassed, by many of the exploits of the commanders of our own armies, particularly during the revolutionary war. The numerous legions of Casar, and other successful captains amongst the Romans and other civilized ancient countries, were led against undisciplined hordes of barbarians, unskilled in the art of war, and could only fail of being victorious through absolute cowardice or inertness-they had but to advance, fight, and conquer; or, if defeated, seek safety in precipitate flight, in which a dreadful slaughter mostly took place among their ranks. Here was no science, no skill, nor any thing, in fact, but persevering personal bravery among the troops required to insure them a victory. Approaching nearer our own times, and viewing the battles fought by the celebrated chieftains of the middle ages, we still find them similarly situated; and coming down to the European commanders of the past or even the present century, and comparing them with the generals who fought the battles of our war of independence, we still find the advantage to rest in a great degree on the skill of the latter. With immense armies and treasures, together with resources it, 'I have a boy, a darling son, some where of great magnitude, arising from the age and stability of the governments under which they acted, the great European commanders combatted an enemy far inferior in discipline and knowledge of war, if not in numbers and resources; with great bodies of men they protected small portions of territory, and generally at one or two battles overthrew their enemy, or were entirely defeated themselves. Wellington, who has gained so much honour on the field of Waterloo, owed it all to the success of one battle, which he principally gained by the treachery of some of his enemy's inferior officers. All the successful commanders of ancient days are now held up to the admiration of the world, while those of more modern days are forgotten, or only remembered as a class of imitators of those great patterns. The generals and other commanders in our revolutionary war evinced more skill and conduct than was required of, or exercised by, almost any of their predecessors in military affairs. Drawn from their fire-sides, the greater part of them at least, to head the armies composed of their fellow citizens, as inexperienced in war as themselves, unprovided with fire-arms or ammunition, or adequate resources of any kind, to oppose commanders schooled and trained in the academies and actual wars of Europe, with disciplined and well-armed veteran armies, often thrice their number, the commanders of America were forced to fight, retreat, draw resources from a country already exhausted by the draughts of their enemiesto protect an immense extent of country with a handful of raw militia; and, in short, with small means, to compass great ends. When we add to these circumstances, that they the marriage life, only looking at the few diffi- with the filial piety of Shem and Japhet, the were often without the common necessaries culties with which it is sometimes entailed; unconscious nakedness of their slumbering I had done with the shilling; the excellent ber of its lakes; and though the density and of life, and with the certain prospect of an and by this means make that appear unproignominious death, in case of the failure of ductive of happiness, which was by God himtheir enterprise, Roman virtue shrinks into | self instituted for the promotion of comfort in littleness, when compared to American pa- all his creatures. A temperate native pride is at all times laudable, and sometimes has a beneficial action upon the affairs of mankind. The numbers comparatively engaged in the wars of the ancient and modern world, and those of our own country, cast a brilliancy upon the former, which should not, however, be suffered to throw the latter into the back ground. Let the American reader view the effects, and the transactions which led to them, in conjunction, and he will be more apt to estimate them properly.

### THE LADIES' FRIEND.

Dancing, in a degree, is professedly an ssential part of a good education, as correctng any awkwardness of gesture, giving an easy and graceful motion to the body, and if practised early, perhaps even directing its growth. Modern manners, however, have carried the fondness for this accomplishment to an immoderate extreme. A passion for making the best figure in a minuet, is vastly beneath the dignity of a woman's understanding. And I am not sure, whether excelling in this particular does not inspire too great a fondness for dissipating pleasures, and proportionably abate the ardour for more retired virtues. A woman, who can sparkle and engage the admiration of every beholder, at a party, or a ball, is not always content with the graver office of managing a family, or the still and sober innocence of domestic scenes. Besides, dancing is not, at certain moments, without its temptation. An elegant illuminated room, brilliant company, the enchanting powers of music, admiring eyes,

medium of gentle agitation. I would not, however, be a cynical moravery delicate complexion. And you will is afforded by the retired shade of your family, a well chosen book, or an agreeable walk. should wish you to be innocent, and, if possible, accomplished at the same time; but, at any rate, I would have you innocent, because

# otherwise you cannot be happy.

MARRIAGE. Marriage was instituted in Heaven. "The first marriage was in Paradise-the first persons conjoined were the first parents of mankind, and the Great Dispenser of all good was the author of their union." With such an exemple as this, who will not exclaim, with Shakspeare, that marriage "is a pattern of celestial peace?" Indeed, I look upon mar- frigid hand was upon her ivory neck, but the riage as an institution that creates all those sweet spirit was repardless of it. Her white finer ties of love and friendship which softens the heart, and purifies the mind.

The marriage state is sometimes not productive of happiness, but it generally happens where virtue is absent.

"No means of happiness when virtue yields; "That basis falling, falls the building too,

" And lays in ruins every virtuous joy. But these are but few in comparison to the number of marriages that daily occur. When the holy bond is cemented by the tie of continued love, and the heart vibrates at the pleasing impulse, we care little what that indescribable wanderer, the Bachelor, may say, for we

" By sweet experience know,
" That marriage, rightly understood
Gives to the tender and the good

" Marriage," says Dr. Johnson, " is evidently the dictate of nature." Men and women are fruits of their patient investigations and unmade to be the companions of each other; and, therefore, I cannot be persuaded but that of obligation which I am as unable to describe marriage is one of the means of happiness .-It is a state not only suited to the conditions of some few individuals, but appropriated to all persons, under all circumstances -extended and the immortal Newton-to Napier, Simson, to the concave arch of Heaven, and of incalculable duration. It will brighten affliction's Sheridan, Walker, Franklin, Fulton and Murgloomy countenance, and make sorrow wear ray? Such has been, at all times, my venecheerful garment. It will deck the humble and contented cot with almost heavenly bliss, that if, in any instance, I find myself enabled, and waft its fragrance even to the most remote recesses of poignant misery.

If we trace marriage to a low state, we may there see cheerfulness and contentment depicted even in the white-washed wall and the clean fire-side—where, though luxury is unknown, the husband returns from his diurnal labour, and rests in the bosom of felicity, while the scanty mite is sweetened when distributed | connive at error, wherever it may be found, by a wife's hands. But, say some, how is the marriage state when surrounded by a family? Why, if possible, enjoying more felicity: they, instead of detracting, in the least degree, from at all times, to better effect, in the mild and the happiness of this state, present themselves as living images and tokens of love, who live to cheer the parent when life shall almost have spun its web.

Marriage has been, by all nations, whether civilized or barbarous, ancient or modern, held with respect and veneration. We have instances of it on record, from the Hebrews, the Greeks, the Romans, &c. &c.; indeed, many burthens have, at various periods, been impos ed upon the bachelors, and honourable rewards offered to those who entered the marriage state.

Messrs. Editors - I submit for your poetical department the following Schediasm. Poctry is considered the language of passion; that which is free and unmeasured I esteem the most impassioned, and think it better expresses the emotions of the soul. It flows direct from the imagination, unrestrained and

unfettered by the shackles of rhyme. V.

THE GRAVE. Nature appeared desolate and mournful; the clouds passed heavily on, shrouding all things in their gloom. The winds sighed sadly through the dark boughs that waved among the tombs: these stood around, like the ghosts of the evening, pale, silent, and motionless. Beneath the cold, but speaking obsequious beaus, attitude, &c. are apt to marble, lay the bodies of the departed, crumtransport the mind a little beyond the rational bling to their primitive dust; bodies which were once among us, in all the joy of life our relations and friends. Where are they list, that would abridge you of any harmless now? Wrapped in the damp clay femaciatamusement. I have only my apprehension ed and haggard as when sickness and death for your innocence, for indeed it is a plant of tore them from us. My soul was melancholy I thought upon the scenes of former times, then have attained the perfection of your when those who now lie buried were with character, when you can mix a passion for us. They were once dear to us, but now these elegant accomplishments with a turn they are alone and cold, beneath the earth. for solid and domestic virtue; when you can On the ground, the fallen leaves were scatone night be distinguished at a ball, and the | tered, the emblems of man's mortality, killed next, want no other entertainment than what by the frosts of winter, and torn from their parent stems: so does death, fell and merciless, sweep from us all that we hold dear .-But the shadows of evening approached, and all was cold, dreary, and comfortless! The sepulchral arches, and upright monuments of the dead, were losing themselves in the uncertainty of the gloom. Do the ghosts of the departed now stalk abroad? Have they burst from their cementaries to walk amidst these shades? I beheld a figure gliding silently across the mounds: pensively it stole among the graves, like the wandering spectre of the night. It approached-it was a beautiful spirit! The raven tresses were too rudely blown by the chill breath of Winter, and his drapery flowed loosely around, as she leaned in sorrow over a tomb, which marked the repose of innocence. She spoke not; but the unutterable meaning of the look she cast to Heaven, and the deep sighs she heaved, betraved-the mother.

FOR THE SATURDAY EVENING POST.

When I contemplate the multiplied benefits arising to us of the present day, from the labours of former generations, as well as the present-the sublime penetration and deep researches of those great geniuses, of all ages, so eminently distinguished as ornaments to human nature, and the generous candour with which they have, from time to time, put on record, for our use and advantage, their invaluable discoveries, of various kinds, the wearied diligence, I feel on my mind a weight

How much do we not owe, for instance, to the great Euclid, the celebrated Copernicus, Simpson and Emerson-to Johnson, Lowth, ration for those great benefactors of mankind. through their merits, to discover, in any o those precious systems which they have bestowed upon us, an error or an omission. a veil of gratitude in a moment interposes before me, and covers forever from any animadversion of mine, those slight blemishes from which no human production ever can be eutirely free; not that I would recommend to or forbid its correction, but we know there are two ways of doing a thing, and I presume that mistakes of this nature might be rectified, excusing temper of a man learned enough to be conscious of his own manifold imperfections, rather than in the boisterous vituperations of the pedant who sees faults in every thing but himself, and who passes over, carelessly, the many excellent qualifications of his best friends, and their kindliest endeavoites for his good, fastens with avidity on their slightest oversights, and, with vindictive malignity, points them out to the unmerited reproach of the world. This is not "doing unto others as he would that others should do unto him; this is acting the undutiful part of the reprobate Ham, rather than concealing parent. I think I may appeal to the breast of every honest man, whether one of this snarling disposition does not, by such mode of correction, (by which he evidently strives to raise himself into notice,) tend more to dis-

last, signed J. Grout, in which that gentleman treats, with unrestrained severity, a Mr. Brown, author of a late English Grammar, (of whom knowledge, except barely what that piece imparts,) and not him alone, but "all his predecessors;" that is, all that numerous host of construction of the English language-nay, even "all those who (now) teach by books!"

A sweep so overwhelming and universal in its embrace, ought to intimidate any one; nor should I dare to make further inquiry, had he confined himself to his two first remarks, namely, on the omission of the verb progress, and the misapplication of ate, according to his own statement, although Mr. Brown might have been excused for the former of these; and as to the latter, which, I think, must have happened through mistake, Mr. G. need not alarmed, under any apprehension of its being now adopted by the learned, as it never was, and because almost every smatterer in English Chammar can see its correctness as well as he. Neither should I feel disposed to quarrel with him, whether he chose to extend or to restrict his applications of the words | genius. either and neither. But my wonder rose that we must, at his instance, Contemn Johnson, Sheridan, Walker, Bailey, Murray, Ingersolves, and all others with them, and believe him upon his bare assertion; for to me his proofs appear ridiculous. Let us examine

In the first place he takes us along to see their Saxon originals, and then tells us, gravely enough, that he can prove nothing from that source. Why take us thither then?-Why, to show us his great erudition. Yes, and moreover, to prove to us, by and by, that he can coin derivations himself, at pleasure,

to suit his convenience. Let me remind you now, gentlemen, in his own terms-I say terms, for they are not all either words or syllables; neither are they sentences or phrases. He says: "The sources of either are-

he, she, it, th, or.

er

From he deduct the masculine e From she deduct the feminine . e And bring both the ce's into one as below; From it, deduct the neuter gender i

Bring down the th as a part of the word Change the o in or into e, and bring down

And you have the word Neither is derived from the same sources, the n being first deducted from the word not Hence," he says, "it is clear that either and neither are separately applicable not only to two persons or things, but to three or three hundred, of both numbers, and of all persons and genders." Yes, gentlemen, because parts of he, she, it, and not, the whole th, whatever it is, and the whole or, after it is by him meta morphosed, are contained in either and neither Excellent critic! But giving him credit for his elements, in their widest scope, they do not warrant his pompous inference, for they consist only of the third persons singular-he, she, and it - which, by uniting, may pass well enough for the third person plural, they. But whence, in the name of abused Etymology, does he fetch the first and second persons both singular and plural, unless by some che mical process, by help of the additional ingre dient or, and sovereign monstraum th?

Is this species of derivation worth confut ing? Not, indeed, for the learned, who smile at the silly stuff; but it may, for the sake of the ignorant, who might possibly be deceived by it. For that pu instance, the word both, which never applied to more than two things, or two parcels of handle this word, and therefore I anticipate

Both, then, is derived from the Saxon compound butu, which is composed of the two Saxon words be, one, and tu, two. Whence the word both applies to one and two; that is, to three; and hence, as it exceeds the dual number, it extends to any number you please. Here, therefore, my point is already establish advantage which Mr. G. had no room to pretend to. But let me try it by his own weights of Ossian's Poems, is in the London press. and measures, for I think I shall succeed there too.

The sources of both are-beau, belle, boy woman, dot, t, man. Perhaps Mr. G. will object to beau and belle. If so, to please him, I can substitute bull and bride, which will do as well.

From beau, deduct the masculine From belle, deduct the feminine And bring both the b's into one.

as below From boy, deduct the masculine From woman, deduct the feminine From dot, deduct the neuter gender And bring the three o's into one, as

below: Bring down the t as a part of the word

Change the m, in man, into h, and bring down

And you have the word both

Hence, it is as clear, I think, as Mr. G could have made it, that both is applicable not only to two, but to three, or three hundred, of both numbers, and of all persons and genders. Hence, I may ask, "If a man distributes, for instance, bread to the poor, does he give to two only? If he is disposed to feed them, may not woth men and women. and children partake of his charity?" Or may not or both the lame and the blind, and the aged and the infirm, and the widow and the orphan, and the naked, be relieved?" "What grammarian hereafter will be so obstinale and ignorant as to say that both the three

With your permission, gentlemen, I think it time to leave Mr. G. in full passession of his (Chinese) trangram Etymology. Had he the Roman Empire! consulted me in time, I could have pointed out a more elegant, as well as a more general system of literal English Etymology, Perhaps he would not have it as not originating with himself. However, here it is for the use of all who may think proper to adopt it : -Place before you the twenty-six letters of by the landlady, Mrs. Wallace, to the cottage the English alphabet : they are all English- of the patriarch, " where they would see (she yes, and the elements of the English language. But I forbear, lest he may choose to say they are all right, and then keep his ground, in defiance of any proofs I could bring, especially as he rejects the au-

thority of books. Now, as we have been gratuitously favoured with an instance of Mr. G's. Etymology, perhaps he may vouchsafe us a specimen of his Syntax, and to spare his trouble in choosing a sentence, should he feel disposed to gratify us, I shall be happy to supply the following short one :- " I have been made several applications to." Should he account this sentence bad English, it lies with him to point out and prove the error. It will not suffice to say, that the same sentence might have been better expressed otherwise, for that would only amount to an evasion, which would not at all comport with his superlative NITRAM EHCOR.

#### SCRAPS. From European Journals

Gibraltar papers to the 22d November have been received. The members of the Regency appointed by the Cortes in Seville, on the 11th June, 1823, viz. D. Coyetona Valdes, De Gabriel de Ciscar, and D. Gasper de Vigolet, who yet remain in Gibraltar, have been summoned to present themselves, within 40 days, in the prison of the Royal Audience of Seville, for the purpose of answering and clearing themselves from the charge preferred against them for accepting and exercising the said Regency; in default whereof, after the expiration of the above mentioned period, they shall be tried, and sentence pass-

ed upon them, as if they were present. One of the last Paris papers publishes a letter from Spain, which says that three thousand men who had assembled at Corunna, to embark for Havana in the two frigates built at Ferrol, rose in a body and refused to go. The greater part of them, it is added, descrted into the country, where they will no doubt

form a strong faction against the government. A late London paper mentions that Sir William Congreve has returned from his tour to the Continent where he had for the last 3 months been engaged in the formation of a company for the employment of British Capital, in the lighting the principal cities of the Continent with gas, under the sanction of their respective governments. It is said that arrangements have been made for this purpose with Russia, Sweden, Prussia, Hanover, and with many of the principal towns in the Neth-

Christmas .- This is the feast of the nativity of our Saviour, and is always celebrated on the 25th of December. The Epiphany is observed on the 6th of Jan. It was believed by the primitive church that both should be celebrated on the same day, but now the celebration is continued from Christmas to the Epiphany. The last is the feast of the adoration of the three kings, of the baptism of our Saviour and his miracles at the marriage of Cana. The word Epiphany signifies the appearance of God on earth, and hence the paptism was confounded with the nativity of our Lord.

Statue of Washington .- To some inquiries n the public papers, in Boston, relative to the subscription received for a monument of Washington, Mr. John Lowell, chairman of the committee for procuring the Statue, states that nearly \$16,000 have been invested in public funds for that purpose; that Mr. Chantry, of Pimlico, London, the great rival of the late Canova, has agreed to deliver the statue on ship board, for ten thousand dollars, and that the committee will, in January next, make a choice of a place for its erec-

Combination Laws .- It appears that the laws against Combinations among Journeymen, which have been repealed in England, are still in force in New York. A number of Journeymen Tailors were tried at Buffaloe on the 21st ult. for the conspiracy to raise the wages. They were convicted and fined two dollars each. It appears very unfair that combinations among purchasers of grain and employers of Journeymen are allowed, while combinations of the less wealthy Journeymen are prohibited. Such laws operate directly against the poor man, and unjustly on all .-The repeal of all those laws in Great Britain is a lesson which we trust will not be lost upon this country.

Steam Boats .- A company has been formed at Baltimore, and the stock immediately subscribed, for the purpose of testing the practicability of running steam boats from York Haven to Northumberland. Experienced watermen are of opinion that the project is quite impracticable: but the Baltimo reans are no less entitled to credit for enterprize, on this account. The completion of he Union Canal, extending to some point between Green's mill and Clark's ferry, will however give the Philadelphians the decided advantage with regard to the river trade.

On Monday last, the President of the United States ratified, with the advice and consent of the Senate, a Convention concluded and signed at St. Petersburg, on the 5-17 of April, be tween the United States and Russia, by Mr. Middleton, our Minister at that Court, on the part of the United States, and Count Nesselrode and M. De Polettica, on the part of the Emperor of Russia, which establishes the boundary line of the two nations, upon the north west coast of America, and in the islands adjacent, at 55 deg. 40 min. north latitude.

POLICE COURT.-Recently a truckman was fined one dollar and costs of prosecution, amounting to \$4.41, for not keeping to the right in the street, as the law directs.

A boy was fined two dollars and costs of prodoor of a grocery shop. He stated that "he only meant to take up the head and get a quid of tobacco." It appeared, however, in eviments: on its return to the house, considera- dence, that the whole keg stuck to the head, and travelled off in company with the quid .-Boston Courier.

Louisville, (Ky.) Dec. 21 .- We are gratified to hear that Dr. Buchanan has succeedday, and immediately called on a gentleman ed in propelling a boat by the application of his newly invented generator. On Sunday tucky, from whom I learned, that the law of last she ran five or six miles up the river and which you speak, has really passed both returned with a number of gentlemen who seem much pleased with its operation. The advantages which it is considered to possess over boilers now in use, are economy in the cost, a considerable saving of fuel, lightness, the space which it occupies, and entire safety against such accidents resulting from the bursting of the boiler; advantages which, combined, cannot fail to introduce it into general use. The boiler of the boat weighs about five hundred pounds. It is understood the Dr. intends applying it to propelling carriages on land, in which he feels confident it will be eminently successful.

> DIABOLICAL ATTEMPT .- On Sunday morning last, an attempt was made to poison a whole family, consisting of seven persons, by the name of Carrol, residing in Laurens street, New York. A basket containing cakes, had been placed on the step, of which the whole partook, not suspecting any injury to follow. A few minutes after, the father was seized with symptoms of rather an alarming by a section introduced by Mr. Mahany, the nature, and before medical assistance, which was promptly obtained, arrived, his wife and children were affected in the same manner. It was ascertained that arsenic had been mixed up with the cakes, and measures were immediately adopted to cause it to be discharged from the stomach. The tather was soon out of danger. One of the children expired in great agony in the evening. Hopes poration. are entertained of the recovery of the rest. Various reports are in circulation respecting this affair; one of which is, that the attempt had been made by a person who had been engaged in a law suit with Carrol, which the former lost, and that, enraged at his defeat, he had adopted this method to gratify his revenge. The basket in which the cakes were found, is said to have been traced to this same person.

CONGRESS .- In the Senate, on Tuesday last, Mr. Johnson, of Louisiana, submitted the following resolution for consideration :

Resolved, That the committee on naval affairs be instructed to inquire into the expediency of purchasing a steam ship or vessel of large size, capable of carrying a great number of men and boats, to be employed on the east of Cuba and in the Gulf of Mexico for the suppression of piracy.

In the House of Representatives, the speaker submitted a communication from the department of the treasury, transmitting the usual estimates of appropriations necessary for the service of the year 1825; which was referred to the committee on ways and means.

Mr. Crowninshield, from the committee on naval affairs, reported a bill " providing additional means for the suppression of piracy;' which was twice read and committed to a committee of the whole on the state of the

Mr. Ingham moved to refer the message of the President, received on the 6th inst. to a select committee. Mr. Forsyth moved to add to the motion, " with instructions to receive from the President any evidences or explanations of his claims which he may think proper to present, and to file the same in the office of the clerk of this house, to be acted upon at the next session of Congress."

A motion to refer the message to the committee on claims, was decided in the negative, by a large majority. The question on Mr. Forsyth's amendments was decided in the affirmative-ayes 90, nays 70.

The question on Mr. Ingham's motion, as thus amended, was then decided in the affirmative, without a division, and a committee of seven members ordered to be appointed accordingly.

Miscellaneous,

A benefit has been given at the Park Theatre, New-York, to Mr. Chambers, the builder of the boat "American Star," which beat Cant. Harris at the late race.

The piece called "Frankenstein," founded on a German legend, of a student having created a monster, has been very flatteringly received at the Park Theatre, N. York.

Charles Gilfert, Esq. who has at present the control of the Theatre in Charleston, S. C. of January, 1825, a balance of 4,506,668 91. and under whose direction a theatre is about to be established at Albany, has been elected manager of the American Opera House, to be erected in New York.

Scotch Theatricals .- Mr. Kean, the celebrated tragedian, recently performed the character of Richard III. to an overflowing audience in the Glasgow Theatre. He looked well, and for which they were severally made, and appeared to be in excellent spirits. His dress | which are, therefore, an existing charge upon was new, and gorgeous to an extreme .-Though we are admirers of Mr. Kean, we cannot say that on this occasion we thought Richard was "himself again." In truth Mr. Kean indulged too much in froth, rant and ferocious gesticulation; in some of his best points we think he failed, and his pauses were miracle he did not non plus the other actors.

Mr. Robert Waln, jr. of our city, beein press a work of more than ordinary merit, entitled the "Life of the Marquis De La Favette." It derives a principal share of interest from the arcumstance of the application which he has bestowed in gathering facts to elucidate the character and services of this great man, and we are satisfied, from the high literary standing of the Biographer, that this work will be generally sought after, as a chaste and correct Memoir of La Fayette, not merely of the actions relative to him, but of many important events which have transpired in his time. Great pains have been taken that this Biography should be composed of the most authentic materials, and considerable advantage has been derived, during eight months investigation, not only of the books relating to the subject, but of the experience and observations of living witnesses of the Marquis' fame and services, during the revolution. It will be embellished with a beautiful half-length portrait of the General, executed by Longacre, from the painting in possession of Mrs. Bloomfield, which some time since attracted so much attention in Philadelphia, and which was sent to this country by the General himself. It will be printed on fine

paper, in about 350 to 400 pages 8vo. It appears, by the able and perspicuous report made to Congress by the Secretary of the Treasury of the United States, on the fiscal concerns of the country, that the actual receipts into the treasury during the year 1823, including the balance on the 1st of January of the same year, amounted to \$24,778,093 81, while the actual expenditures during the same period was 15,314,171, leaving a balance in the treasury on the 1st of January, 1824, of \$9,463,922 81. The actual receipts into the treasury during the year 1824, embracing the moiety of the loan of five millions authorised by the act of the 26th of May, 1824, for paying the 6 per cent. stock of 1812, as also the balance in the treasury on the 1st of January, 1824, forms an aggregate of 36,444,816 77; the expenditures for the same period are estimated at 31,938,147 86, which leaves in the treasury on the 1st It is observed, however, that this balance is not to be considered as subject to appropriation, as there is about an equal amount of unsatisfied claims, which, though not called for in the year 1824, are necessary for the objects the means of the treasury.

COMMUNICATION.

It is announced in the last number of this paper, that there has been an important law decision, in the state of Missouri, respecting slaves. The decision runs thus :- "That the residence of a master, with his slave, in Illinois, with an intention of making that state his permanent place of abode, gives to the slave his freedom, by virtue of an ordinance made in 1787." Hence it appears that all masters, emigrating from Illinois with their slaves, in order to evade the emancipating law of that state, and who go to the state of Missoui, will still be subject to such law. (Would that that ordinance had the same bearing on every portion of these United States where slavery is tolerated!) What are we to expect would be the result united states where peet would be the result united states where pect would be the result unless Liberty in Missouri, can raise her arm equal in force to her opposers in Indiana, and hurl the detestable monster, Slavery, from existence, ere table monster, Slavery, from existence, ere he raises his head with increased strength on that rich soil. Did the present inhabitants of TE BURTON, both of this city. Missouri but appreciate the glory, honour, peace and prosperity, that would redound, not only to their own state, but to the Union, by the successful termination of the contest against slave-holders, they would not hesitate to lend their assistance in the cause of freedom. Slavery is obnoxious to the free-born soul: it racks the foundations of kingdoms, and overturns them. Even Rome, that once was called the mistress of the world, was levelled by it. Her citizens became proud. dissipated, luxurious, and unnerved, and therefore were an easy prey to her numerous and surrounding enemies. Many of those nations who used to tremble at the Roman name, be-

and became a despotic monarchy, it behoves the Americans, (whose very foundation is Liberty,) to look on that deceitful viper with a forbidding aspect, and feel the most violent hostility to it, even in its fairest shape .- E.F. 

Warning to Collectors of M titia Fines. Reported for the Saturday Evening Post. W. J. Before Tiberius Jefferson Bry ant, Esq. a Justice of the Peace J. S. P. Sfor the County of Philadelphia.

Summons issued, October 9th, 1824. Returned, the 1oth inst. at 10 o'clock, A. M. } An action on the case for taking the personal property of the plaintiff, consisting of a pair of brass andirons, valued at eight dollars, for two dollars fine, for not performing military duty in 1824, and not making any return to the plaintiff of the manner in which the defendant disposed of the property. Constable, Welbank, returned summons, on oath, as having left a copy at the defendant's dwelling, the 9th of October, 1824. October 16th Joseph Hemphill, Samuel Wetherill, Lewis 1824-The plaintiff appeared and claimed eight dollars for the andirons. He produced a copy of the levy which was made on the 13th of August, 1824, and proved, by T. M. R. Esq. the hand writing of the defendant. It also appeared, before the Magistrate, that a friend of the plaintiff, (Mr. M.) had called on the defendant, and asked him if he had not setts, W. Crowninshield, of do. And at a militia fine against the plaintiff? The demeeting of the board on the evening of the fendant replied in the affirmative. Mr. M. then asked him if he had made a levy on the plaintiff's goods? To which the defendant replied he had not. Mr. M. then paid the defendant the two dollars fine for the plaintiff in this cause, and took a receipt from the deminister Review, a new journal, conducted fendant for two dollars, which receipt was with great spirit and acuteness, speaks thus also proven by T. M. R. Esq. and that the of the Discourse of Charles J. Ingersoll, Esq. money had been paid in his presence. After pronounced in October, 1823, before the hearing the evidence, the Justice gave judgment, in favour of the plaintiff, for the andi rons, amounting to eight dollars with costs of "This is a rapid but brilliant sketch of the suit. Ye young companions of our departed friend, Pause, and reflect how soon your life may end; Think of the flower that bloom'd but yesterday, How soon, 'twas mpt, to wither and decay. Her work was short-nature's debt is paid. And in the grave her lovely form is laid;
There it shall rest, till God that loves the just,
Shall bid it rise, tho' moulder'd in the dust. No sichness there disturbs her quiet breast, She's gone-'twas by her Heavenly Father's will. Let Etizabeth's virtues be on you imprest. The part she chose to insure eternal rest, That when the hour of death to you appears, Jesus will sooth, like her's, your anxious fears.

OBI : UARY.—Departed this life on Tuesday afternoon, Mrs. 5ARAH RIHL, at the advanced age of 85 years, the greater part of which she lived in the immediate vicinity of Kennington, where a few of her early associates, and a of ken ingron, where a few of her early associates, and a multitude of acquaintances remain to testify her worth and attainments. Blest with a penetrating mind, and retentive memory, she would often delight the youthful hearer with the pleasing tales of former times. The days and events of the Revolution, in particular, were themes she loved to dwell upon; for then she shared in the perils peculiar to the ravages of war. Her husband fell in bartle, during the early part of that struckle, and she was tle, during the early part of that struggle, and she was left, with a large family of children, amid the dangers of the day, surrounded by a ruthless foe, a part of whom were lodging in the very house she occupied, having driven her from its lower apartments. She attained a good old age, and has descended to the total like a shock of corn, fully ripe, for the great harvest of the latter day

Res', rest, oh! parent, rest in peace!
But still thy memory shall live
Wi hin our bearts, 'till life shall cease, and we on earth no longer grieve.

BAKED BEANS. Oh! how my heart sighs for my own native land,
Where potatoes and squashes and cucumbers grow;
Where cheer and good welcome are always at hand,
And custacts and pumpkin pies smoke in a row;
Where pudding the visage of hunger serenes,
And what is far dearer, the pot of bak'd beans.

And what is far dearer, the pot of the decime.

Let Maryland boast of her district profuse,
And large water-melons, and cantelopes fine,
Her turtles and orsters and terrapin stews,
And soft crabs high-zested with brandy and wine.

Ah! neither my heart from my native land weans,
When smokes on the table the pot of bak'd beans.

When smokes on the table the pot of at a terms.

The pot of bak'd beans! with what pleasure I saw it Well season'd, well pork'd, by some rosy fac'd dame; And when from the glowing hot oven she drew it, Well crisp'd and well brown'd to the table it came.

Of the dark Indian pudding and pot of bak'd beans. The pot of bak'd beans! Ah, the muse is too frail,

The pot of oach scans; All, the indust is to lead to take its taste to descant on, its virtues to tell; But look at the sons of New-England so hale, And her daughters so rosy—'twill teach thee full well; Like me it will teach thee to sigh for the means of health—and of rapture;—the pot of bak'd heans.

### "OUR TOM SAYS SO."

Whether a disposition to tell tough stories is born with some folks, or not, requires more of a philosopher than I am to determine; but such a theory might be well supported by the evidence of living examples. I have known men of good capacity, and in other respects, harmless lives, who, in most of their conduct, evinced sound sense, and sound discretion too, so notoriously given to lying, that they were not in one case out of a hundred believed, when they spoke the truth. Tom Twist, was one of these. His father lived on the top of the hill, about half a mile from us, and Tommade it his principal business, when times were dull at home, to wander about the neighbourhood, and retail the news to the good housewives and their children; never failing to carry home with him a good store of the marvellous.

Tom at first, maintained so much apparent consistency in his stories, that his good old father used frequently, on his own credit and No. 258, Market Street, fifth door below 8th street, father used frequently, on his own credit and No. 258, Market Street, fifth door below 8th street, father used frequently, on his own credit and responsibility, to repeat them. But in process of time, it was discoverable that Tom's fancwas so much better than his memory, that truth and he seldom dealt together. The old man observed it, and used afterwards to finish his second hand narratives with the brief but pithy scatence—Our Tom says so. Thus peo-ple knew how much of the story to believe; the old gentleman's credit remained unimpeached, and nobody suffered harm, because nobody believed the story.

It is a pity people are not all as considerate in these days, as old Mr. Twist, used to be .-We should then know better what to believe; for there are more Tom ! wist's in the world than one, and many a man who retails other people's stories, would save his credit, if he took care to rest them on the shoulders of their first propagators .- Emporium.

In the course of a trial lately held at Albany, N. Y. an eminent Counsellor well known as a practitioner in bombastic, inflated, and ridicuous language, put the following questions to a witness:

Counseller. Did not you see Mr. -- , raise his muscular arm, and attempt to enforce and coerce a preponderation of the timidity and fears of my chient? Wilness. Sir?

C. Did not Mr. - attempt the inflic tion of the most violent and outrageous corporeal contusion and chastisement?

C. Did not Mr. - attempt to strike the plaintiff? W. Yes, Sir.

C. From your situation, could you not have the most commanding view of the altercation; and was there any thing interfering between you and the objects, that could in any wise dim your opticular faculties, or create any obtuseness of vision?

C. I say, sir, were not your organs of sight in a situation to have a most clear, unclouded, and bright, view of this most villainous, foul, and rancorous transaction?

C. Did you not plainly see Mr. knock Mr. -- down? W. Yes, sir, I did.

New Nose .- A short time since, a young lad, an apprentice to a plasterer, in Perth, had his nose bitten off by one of the mail-coach horses. The Taliacotic art of a neighboring surgeon was put in requisition, and the detached member was restored to its proper situation. The operation, however, had to be performed twice, ere the plasterer was fully satisfied of the perpendicularity of the index of his countenance.

# THE TWO ELEPHANTS.

Not long since, two elephants were taken from the menagerie of the Prince of Orange, at the House in the Woods, near the Hague. The morning after their arrival in Paris, these animals were put in possession of their new habitation. The first who entered was the male (Hans) who seemed to enter it with a degree of suspicion. After having issued with precaution from his cage, his first care was to survey the place. He examined every bar with his trunk, and tried their solidity. The large screws by which they are held together large screws by which they are held together were placed on the outside; these he sought for, and having found them, tried to turn them, but was not able. When he came to the partition, or gate, which divides the two he found it was only fixed by an nov, 6—tf the partition, or gate, which divides the two apartments, he found it was only fixed by an iron bar, which rose perpendicularly. He raised it with his trunk, pushed up the door, and entered into the second apartment, where he took his breakfast quietly, and appeared to be perfectly easy. In the mean time, the female (Peggy) was conducted into the first lodge. The mutual attachment of these animals was recollected, and likewise the difficulty with which they were parted, but the first lodge. and induced to travel separately. From the time of their departure from the Hague they had not seen each other; not even at Cambray, where they passed the winter in 1797. They had only been sensible that they were near neighbours. Hans never lay down, but always stood upright or leaning against the bars of his cage, and kept watch for Peggy, who lay down and slept every night. On the least noise, he sent forth a cry to alarm his mate. The joy they felt on seeing each other again was thus expressed :- When Feggy entered, she uttered a cry, denoting the plea-sure she experienced on finding herself at liberty. She did not immediately observe Hans, who was feeding in the inner lodge; neither was he directly aware that she was so near him; but the keeper having called so near him; but the keeper having called him, he turned round, and on the instant the cond st. keep for sale a large assortment of Clarified Quills. two elephants rushed into each other's embraces, and sent forth cries of joy so animated and so loud, that they shook the whole hall, They breathed also through their trunks, with such violence, that the blast resembled an impetuous gust of wind. The joy of Peggy was most lively; she expressed it by quickly flapping her ears, which she made to move with astonishing velocity, and drew her trunk over Hans with the utmost tenderness. She in particular put her finger (the extremity of the trunk terminates in a protuberance which stretches out on the upper side in the form of a finger, and possesses in a great degree the niceness and dexterity of that useful member) into his car, where she kept it a ong time, and after having drawn it affectionately over the whole body of Hans, she put it tenderly into her own mouth. Hans did exactly the same to Peggy, but his pleasure was more concentrated. This he appeared to express by his tears, which fell from his eyes in abundance.

# FOR COUGHS AND COLDS.

FOR COUGHS AND COLDS. An Apped to the public on the necessity of guarding against that nuck neglected Comptaint generally termed a Common Cold and Cough, and of applying a safe and timely Remedy.

If we take a cursory view of the amazing number of diseases with which the inhabitants of the world are afflicted, and the almost innumerable remedies perpetually advertised for each, we should be apt to imagine that it is temptly no shiple for any hungan being to enjoy ally advertised for each, we should be apt to imagine that it is sencely possible for any human being to enjoy uninterrupted hearth for the short period of a single month by any effort of prudence or discretion which it may be in his power to exert: but if we minutely examine into the nature and causes of these apparently distinct and separate complaints, here we must be surprised to find that a common cold has been the despised and neglected parent of by far the greatest proportion. This being the fact, and which is well known to men of science and experience, into what narrow limits might not the and experience, into what narrow limits might not the application of medicine be confined, could we but be persuaded to pay more attention to ourselves on the first approach of those symptoms which clearly indicate that we have caught cold r but we are too often deceived into an opinion, that while they are slight, there can be little or no occasion for medicine, which, for the most part, is generally loathsome and disagreeable, and which too few are prevailed upon to take while free from pain, or conceive themselves in no danger. A little reflection, however, upon the serious consequences that may hap pen from neglect, may lead to the adoption of the pleasant preparation now offered, which will be found both innocent and efficacious if taken according to the direc-

bout three years ago, and was formerly one of the most avage and untractable of the species. He was broke by savage and untractable of the species. He was broke by Mr. Martin, his keeper, and would never be governed by any other person. The sagacity of this animal, together with the intrepidity and dexterity of his keeper, produce a spectacle, not only curious and diverting, but in some instances horrible to the spectator and dangerous to the keeper. Among a variety of singular marks of sagacity, he takes a stand in the centre of the room, and moves briskly round—his hind feet remaining in the centre, forming a circle with his head—places his keeper on his tusks, and in continued repetition round the circle, tosses him to the heighth of 10 or 12 feet, and with the most singular and seemingly studied accuracy, exters ost singular and seemingly studied accuracy, eatches in upon his tusks and trunk; and in conclusion, gives in a toss into the air, the keeper turns a sometset in his flight and safely tands on the back of the Ele-phant. ## SWAIM'S PANACEA.

THIS valuable Medicine has obtained a distinction which its efficacy alone can support. As a purifier of the blood it has no parallel. It is the most useful spring and autumn alterative ever known. All those who are affected with Scrafula, Lepray, Scurry, or cutaneous Eruptions, or any of those melancholy diseases arising from impurity of the blood and juices—also, those who suffer by diseased Liver, Rheumatic affections, or from indiscretion of their youth, or those whose constitutions are broken down by mercurial, antimonial, or arsenical medicines, should submit to a course of Swaim's Panacea. The effect of this Medicine is such as not to interrupt either business or pleasure, and requires only the common restraints of moderation in diet. It is conveyed by the circulating fluids, and corrects their tendencies to all those diseases which originate in vitiated blood. It is a safe, though a powerful substitute for mercury, and removes those evils which an unsuccessful use of that mineral so often occasions, &c.

In all complicated cases of Scrofula and Syphilis, and where the Syphilitic Virus of the parent causes a development of Scrofula in the child, this is the only remedy upon which a single hope of recovery can be reasonably founded; there has been no instance of its failure, when properly used. It impacts vigour to the whole system while the cure is going on—an operation so long looked for in vain by the medical world; at the same time the patient is enabled to take nourishing food, which under the common nodes of practice, is smaller which under the common modes of practice, is usually withheld from the sufferer. In many instances where the horrible ravages of ulceration had hid bare ligament and bone, and where, to all appearance, no human means but amputation could have saved life; in cases extreme as even here described, have patients been snatched from the grave and restored to good health, and the devouring disease completely eradicated. The discovery of a remedy like this now effered for sale has been a desideratum from time immemorial.

The Proprietor does not suppose his bare assertion will convince: he will therefore give references to such as have been cured, and those under his care, among whom are many highly respectable citizens, that shall satisfy the most incredulous of its superior efficacy in which under the common modes of practice, is usually

CAUTION TO PURCHASERS. The great demand and wonderful success of this medi-ine, has induced a number of persons to imitate it in cine, has induced a number of persons to imitate it in various ways. Anderson's Cough Drops AND PECTORAL POWDERS.

AND PECTORAL POWDERS,
As prepared by JAMES MELLEN of Hadson, are known by many thousands who have tried them in the United States and in Canada, to be one of the best Medicines in use, for Coughs, Asthmas and Pains about the Breast, and other affections of the lungs leading to Consumption; a very fewdoses will often, if used in season, allay the irritation and effect a cure, if high fever or inflammation does not exist. To accomodate the public, they are sold in Fifty Cents and One Dollar vials, and have the words "Prepared by I. Mellen," stamped on them, and I. Mellen, in writing, signed at the bottom of each printed direction, and no other medicine is entitled to the Certificates of Moses Kimball, Christopher Cook, or Stephen Seaman, notwithstanding some perthed to the Certificates of Moses Kimball, Christopher Cook, or Stephen Seaman, notwithstanding some person has taken the liberty to apply them to what he calls Anderson's Cough Drops, signed D. E. Smith, offered by S. Potter & Co. but the public may consider it a deception to profit by, as all those cures were performed by the Cough Drops prepared by I. Mellen.

And as a further proof of the efficacy of said Mellen's Cough Drops, which are called Anderson's, in New-York and the Eastern States, the following certificates are added:

NEW CERTIFICATES. I Hereby Certity, That for more than a year previous to 1821, I was afflicted with a trouble-some and alarming cough, which rendered me unable to labor or even to walk cough, which rendered me unable to labor or even to walk many rods without causing profuse sweating, and after trying many things without relief, I obtained a Vial of Anderson's Cough Drops, prepared by I. Mellen, from the use of which I soon found great relief, so as to be able to resume and continue my usual labor, and I have reason to believe that the use of them was the means of saving my life, as I had but little hopes of recovering again when I commenced taking them; and I think them undoubtedly the best medicine in use for complaints of the lungs.

lungs.

ELISHA DAVIS.
Having made use of Anderson's Cough Drops in my family, and having been requested to express my opinion of their efficacy in the cure of coughs, I herely certify, that a daughter of mine was severely afflicted with a cough for about a year previous to the summer of 1820, during which time she was more or less attended by second during which time she was more or less attended by several physicians; but, appearing to obtain no reliet, her life was despaired of. Being informed of the great cures effected by Anderson's Cough Drops, I was induced to make use of a bottle, and in the course of one week only she was greatly relieved of her complaints. After using two bottles she entirely recovered, and now enjoys as good health as ever. From my own experience therefore, I have no hesitation in recommending these drops

fore, I have no hesitation in recommending these drops to the public, MOSES KIMBALL.
Haverhill, (Mass.) August 11, 1821.
This is to certify, that I, the subscriber, have been afficted with the Asthma for 20 years, and the paroxysms were often so violent as neatly to deprive me of breath. During one of the most violent returns of the Asthma I was advised to try Anderson's Cough Drops, as prepared by I. Mellen, and I did so, and to my surprise, I was very soon entirely relieved, and felt no more of it for six months. Upon a return of the paroxysm of the Asthma, I have made use of the same medicine, and it has unvariably given me relief. As it respects the asthma, and ma, I have made use of the same medicine, and it has unvariably given me relief. As it respects the asthma, and its attendant symptoms, difficulty of breathing, &c., I consider Anderson's Cough Drops a remedy, in praise of which too much cannot be said. I further certify, that my son-in-law had for some time been supposed to be mast recovery of a Consumptive complaint, when I advised him to make a trial of Anderson's Cough Drops, and from the use of them, be has so far recovered his health as to be again able to attend to his business.

# Elliett's Hair Restorative.

For the promotion, renovation and retention of the Hair. Decidedly superior to any yet produced. IN offering the Hair Restorative to the attention of those who may require its aid, in the prevention of the falling off of their Hair, the promotion of its growth (even in cases of hereditary baldness.) or for the renewal of its growth if impaired by sickness or other causes, the proprietor feels confident that it will equal every reason-able expectation—its efficacy in the cases mentioned, hav-

ing been most amply tested.

A very few applications of the Hair Restorative, where A very tew applications of the Hair Restorative, where baldness prevails, will be productive of a covering of Young Hair, resembling the fine capillaments perceivable in the centre of a flower growing up within a plant, which, by attention in the use of the Restorative will, like the young flower, rapidly advance to healthy maturity. Such have been its effects, as experienced by the proprieter, who had been update to the inconvenience. proprietor, who had been subject to the inconvenience of baldness for the last 20 years: And in several other cases of a similar nature, the like success has attended the use of the Hair Resporative, as those benefitted are

ready to testify, if necessary.

As a general HEAD-WASH, the Restorative is calas a general H. A.D. WASH, the Restorative is can-culated to prove highly useful and agreeable. By using it a few times, the Scurf or Dandruff, which so frequently accumulates around the roots and ultimately destroys the Hair, will be finally eradicated from the membrane. And, by its cephalic influence upon the capillary vessels in all cases of renewed growth, the Hair will be HEAL-THY and THICK, and acquire additional lustre. Even to those in the passession of good Hair, the use of the Restorative would prove essential, this much as it would aid them in preserving that invaluable and highly ornamental natural covering. To those desirous of the em-belishment of Whiskers, it will promote their g owth. As a gentle, innocent, and emiga Cephalic, the Resto-rative may be safely, and with good effect, applied to the heads of Infants or Children, whose Hair may apthe heads of Infants or Children, whose Hair may appear deficient.
